ABOUT ME

I'm Mae Ann, a web developer and designer passionate about creating clean, functional, and visually appealing websites. With a strong foundation in React and Next.js, I specialize in building fast, responsive web applications. However, I focus on minimalist and aesthetic principles to create simple yet impactful user experiences.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, HTML5, CSS3

Frameworks/Libraries: React, Next.js, Node.js, Express.js

Styling: Tailwind CSS, Bootstrap, Styled Components

Databases: MySQL, PostgreSQL

Tools/Concepts: Git/GitHub, REST APIs, Object-Oriented Programming (OOP), CPU Scheduling Algorithms, System Architecture

PORTFOLIO PROJECTS

FCFS Scheduling Simulator (First-Come, First-Served)

- A web application that visually demonstrates the **First-Come, First-Served (FCFS)** CPU scheduling algorithm.

- Features: Clear visualization of process execution order, real-time calculation of Waiting Time and Turnaround Time, and an intuitive interface for adding and managing processes.
- Technologies: React, Next.js, JavaScript.

7-EVELYN E-commerce Platform Site

- A simple e-commerce site mock-up focused on a modern shopping experience.
- Features: User authentication, product catalog, search and filter functionality, and a dynamic shopping cart with a simple checkout process.
- Technologies: React, Next.js, Context API (or Redux), CSS Modules/Tailwind CSS.

EXPERIENCE

Web Development Projects

- Developed web applications using React and Next.js with an emphasis on clean UI and high performance.
- Built interactive tools, including a CPU Scheduling Simulator and various frontend-focused projects.
- Applied responsive design principles and modern JavaScript best practices.

.

EDUCATION

Elementary: Katupunan, Elementary School

Secondary: Katipunan National High School

Tertiary: Cordova Public College
